

QUALITY & ENVIRONMENTAL POLICY

Venson, a leading provider of fleet management solutions, considers respect for the environment an important business responsibility and encourages all employees to take an interest in the protection of the environment.

Venson will therefore:

- Ensure that the company complies with appropriate legislation and regulations.
- Identify and evaluate any environmental effects associated with fleet management, equip-for-purpose, repair and maintenance, asset management, funding and workshop management, in order to control and reduce any environmental impacts, including the prevention of pollution.
- Ensure the responsible use of natural resources and the minimisation of waste and energy consumption.
- Implement the training of employees to ensure that they are environmentally aware and that neither they, the community nor the environment are exposed to harm as a result of Venson operations.

In meeting the above, Venson also aims to achieve high levels of customer satisfaction by delivering reliable, high quality, cost effective products and services within agreed timeframes thus generating the returns required to:

- Reward stakeholders for their investment.
- Reward people for their efforts.
- Provide the funds to support future operations and company growth.
- Provide a stable and enjoyable work-place for the entire team.

Venson is committed to the continual improvement of its performance by the monitoring of quality and environmental issues and through involvement with customers, suppliers, regulatory authorities and the community.

To assist with the above, Venson has implemented an integrated Management System that meets the requirements of ISO 9001:2008 and ISO 14001:2004.

Compliance and improvement is monitored by process measures and internal audits and is maintained by the timely implementation of preventive and corrective actions.

Meeting these standards is the responsibility of the entire team. Venson is therefore committed to working with all stakeholders to support effective operation of the company's Quality and Environmental Management System and the achievement of goals and of specific Quality and Environmental Objectives.
